

Isolated Severe Storms Possible Today...Flooding Continues

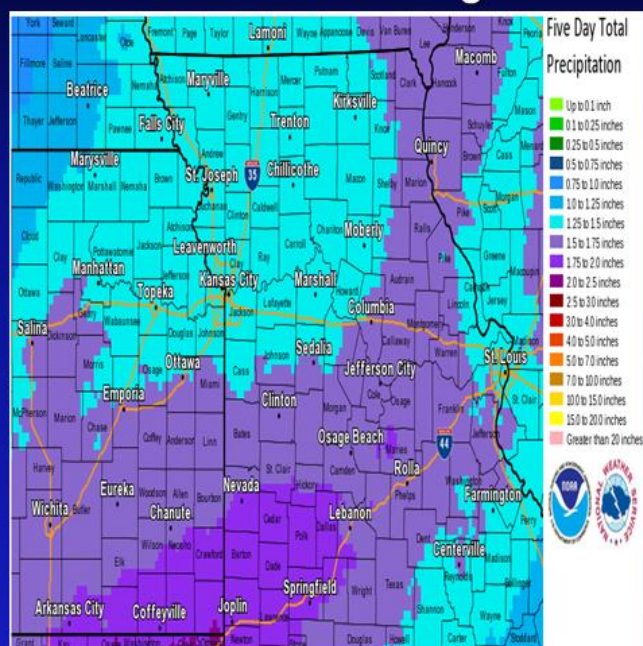

Severe Potential Low

Short Term Issue:

Chance for an isolated severe storm across Northern Missouri this afternoon.

Long Term Issue:

Additional rainfall leading to continued flooding.

Valid ending at Sunday May 31st, 2015 at 7 AM CDT

Additional Rainfall Through Sat. Night

- Isolated to scattered thunderstorms will be possible over northern Missouri this afternoon. Severe potential will remain low.
- Scattered thunderstorms are expected this evening...severe weather is not anticipated, but gusty winds will be possible.
- Isolated to scattered storms will be possible every day this week...organized severe weather is not expected, but gusty winds will be possible.
- Ongoing river flooding may be prolonged and exacerbated by additional rainfall. An additional 1 to 2 inches, with locally higher amounts, is expected through Saturday.
